Pure elegance: AMBITION OpArt “White Sand”

Scandi Chic is perfect for people who like a home or office that is tidy, but not clinical. The living style with clean lines, a lot of white and soft colour tones creates a simple, relaxing yet elegant effect. Faber-Castell has created the perfect desk accessory for the trend: the AMBITION OpArt “White Sand” is clean, pure and classy. The fine guilloché is eye-catching, creates fascinating optical effects and gives a light grey shimmer to the white. The elegant model in the OpArt series is based on a lovely idea: it is a tribute to optical art, a stylistic art form from the 1960s. The OpArt “White Sand” is extremely comfortable to use. In the ballpoint pen, this is down to the twist mechanism which allows the large-capacity, black refill with line width B to be extended and retracted. For maximum writing comfort, the fountain pen has a high-quality nib width M and a cap which can be easily reconnected. With its spring-loaded chromed clip, the cap ensures that both pens are held securely in a writing case.

And if you like things to be more black and white: with the AMBITION OpArt “Black Sand”, the AMBITION OpArt “White Sand” has already found its dark counterpart in the collection. Together they make an attractive pair and a perfect double gift for Christmas, a wedding, creation of a joint company – some accessories are simply ideal for any occasion!
